

Post Fundal Fluorescein/ Indocyanine-Green Digital Angiography Advice

After your Fundal Fluorescein/ Indocyanine-Green Digital Angiography, there may be yellow discoloration of the skin, the whites of the eyes and the urine, which will last for a day or two.

Please seek medical advice immediately if you experience any of the following conditions:

1. Nausea, vomiting, dizziness
2. Develop any rashes on the same day of the procedure
3. Have low/ no urine output for the 6 hours after the procedure

For any medical assistance:

Please call 6363 3000 during office hours from Monday to Friday, 8:30am to 5:30pm.

You can also visit WH Emergency Department after office hours, including weekends and public holidays.
